THE REGIONAL MUNICIPALITY OF WATERLOO

COMMISSIONER OF PLANNING AND DEVELOPMENT

TO: Chairman Brian Turnbull and
Members of the Regional Planning and Development
Committee
Regional Municipality of Waterloo

DATE: January 31, 1984

SUBJECT: REPORT ON REGIONAL SUBDIVISION ACTIVITY
DECEMBER 31, 1983

RECOMMENDATION:

*For Information.*

REPORT:

## Introduction

The Regional Subdivision Activity Report is updated three times annually, once at the end of April, August and December. The report for activity at the end of December includes analysis and conclusions for the entire year. This report summarizes the activity in the Regional Municipality of Waterloo as of December 31, 1983. A detailed unit count for all registered plans of subdivision, draft approved and pending plans is available upon request from the Regional Planning and Development Department. Status of Plans maps for each Area Municipality are also available.

## Analysis and Conclusions

### Registered Plans:

The land supply in the Regional Municipality of Waterloo for all types of residential units, as yet unbuilt in registered plans, as of December 31, 1983 was 16,557 (See Table 1). This represents a decline of 432 units from the December 31, 1982 total of 16,989. This decline is the result of an increase in the number of building permits and the registration of 3 plans for 1983. All areas experienced a decline in the number of available units.

During 1982, 20 plans were registered with a total of 987 units whereas the 3 plans in 1983 contained only 256 units. The plans registered in 1983 were the resubdivision of existing lots and blocks and that had the effect of reducing the number of units. The reason for the large number of plans registered in 1982 was because of the changes in the registry system (Certification of Title). As in previous years the majority of the plans contained single and semi-detached units.

Draft Approved Plans:

The total number of residential units draft approved in the Regional Municipality of Waterloo has increased by 250 units from the December 31, 1982 total of 10,829 to the December 31, 1983 total of 11,079. (See Table 2). All areas remained relatively the same except Wilmot Township which showed a gain of almost 140 units. This increase is a result of the approval of Official Plan Amendments for the settlement areas of Petersburg and Mannheim.

For the year 1983, 12 plans received draft approval containing 553 residential units and for the same period in 1982, 21 plans containing 2483 residential units were approved. The predominant type of residential units being draft approved is still the single family and semi-detached dwelling type. During the year the Regional Municipality of Waterloo given extensions to draft approval a number of subdivisions. This accounts for the stability in the number of units available that are draft approved.

Pending Plans:

The number of units in pending plans of subdivisions in the Regional Municipality of Waterloo had decreased from a total of 8,350 units in December 31, 1982 to a total of 7,924 units December 31, 1983. (See Table 3). The net decrease of 426 units is based on the fact that fewer plans were received than were draft approved. In 1982, 13 plans were received containing 761 units. Of the 7 new plans 3 were of industrial/commercial nature and are not monitored in this inventory; the remaining four plans contained 110 units. Two of the industrial plans were located in the Huron Area of Kitchener and were submitted because of the approval of the Official Plan Amendment and the Zoning By-law. The greatest change occurred in Wilmot because of the draft approval of several plans in the Mannheim and Petersburg settlement areas.

This reduced number of units will not affect the short term supply of new residential units because of the large number of unbuilt registered units and draft approved units, but, if the trend continues it would have an affect on the availability of new housing stock in the very long run.

Building Permits:

The continued effect of Government Programs on the building activity was felt in 1983. Both Provincial and Federal Programs which have been in existence encouraged construction of both low and high density development.

With the easing of mortgage rates, the lowering of the inflation rate and an increase in consumer confidence in the economy building activity has increased to the level experience in 1978 to 1979 but still only half that of early and mid 1970's.

Table 4 shows that there were 2,180 new residential unit building permits issued in 1983 as compared with 1,370 units in 1982. This increase is reflected in all types of dwelling construction. The largest area where an increase was registered was in single family construction. In 1982 for single family dwellings, 566 permits were issued while in 1983, 1092 were issued. All Area Municipalities experienced an increase in activity.

Table 5 shows the number of building permits issued in the Regional Municipality of Waterloo since 1972. This table shows the level achieved in 1983 is the largest since 1977. Even with the number of permits issued in 1983 it is not comparable to the early years for the 1970's.

The Regional Municipality of Waterloo in August 1982 prepared a report Housing Needs: An Appraisal 1981 - 2001 for the purpose of assessing housing demand and needs in the Regional Municipality of Waterloo in light of changes in economic activity population growth rates and government programs. On Table 3 of the report a forecast was prepared combining both new ownership and rental units for each year of 1982 to 1986. The forecast for 1982 was for a total of 1159 new units, whereas building permits indicated 1370 units were constructed. In 1983 the forecast was for 2090 units and 2180 were constructed. In both instances the forecasts were very close. The study projects for 1984, 3158 new residential units with the predominant type being ownership dwellings.

Highlights:

1) The contined influence of both Federal and Provincial Housing programs on the building activities supported by an improved economic climate.

2) The continued availability of residential units through units registered but not built upon and the number of units in draft approved plans of subdivision.

3) The relative accuracy of the projections contained in the Housing Needs: An Appraisal 1981 - 2001 and the need to monitor future years.
